INSIDE THE PERFECT PREDATOR

default watermark

Soaring above the people of London on the planet, the peregrine falcon, her chicks. Off the coast of South Africa, a predatory fish, the great white shark, on a 7000 mile journey and is hungry for prey. In the savanna plains of Africa, the fastest land animal, the cheetah, struggles to provide for her cubs as a drought strikes. And having survived a drought by entering a state of suspended animation, the prehistoric crocodile is poised to ambush his dinner.

With ground-breaking computer graphics and close-up photography we reveal the secrets of nature. Who gives these four extraordinary hunters their prey? At the moment they detect their prey through the air, who is the Perfect Predator?
